

Liquid Avatar FAB – Features, Advantages and Benefits

Have full control of your Digital ID - Show the Digital World Who You Are®

With Liquid Avatar you can not only secure your own Digital ID, but safely store and share your personal, public and private data that is attached to your ID. In fact, you have full control over who you share your information with and when.

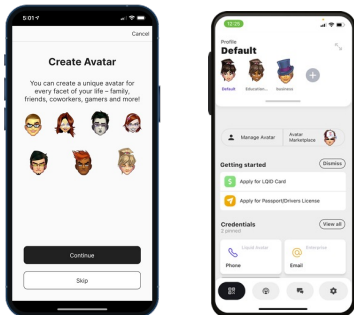

A Liquid Avatar is a multi-layered, visual technology icon that contains information that can be linked, authenticated, and shared. Contacts can automatically be privy to your public information, then you decide what permission-based private data can be shared and authenticated. It enables you to manage you different online personas and only *share what they want, when they want and with whom they want*™.

Create your online identity now and always have your digital information handy.
